143	12	40	666	2,504	2,287	2,420	895
2,461	446	524	18,537	44,394	20,896	17,542	3,322

INDIVIDUALS SCREENED THIS WEEK: **8,967**

ORIGIN OF ENTRANTS TO SOUTH SUDAN (n=2,794)

Travelers were predominately of South Sudanese nationality (86%), whereas 14 per cent were Ugandan and less than 1 per cent were DR Congolese, Ethiopian and Somalian nationals. Entrant origin information is self-reported.

XX - Democratic Republic of the Congo(DRC)
XX - Uganda

HEALTH UPDATES

- Planned inter-agency assessment in Lasu could not be completed due to access being denied at Kegulu checkpoint
- There were no alert cases reported during the week, although there were 27 fever cases, the majority of which tested positive for malaria, and rumours of a suspected EVD case in Kaya were confirmed to be false

SUSPECTED/ CONFIRMED EVD CASES: **0**

WASH UPDATES

- Community Health and hygiene promoters continued with hygiene and EVD promotion activities through house-to-house visits, water point sessions, market sessions, public sessions, child-to-child sessions and jerry can cleaning campaigns

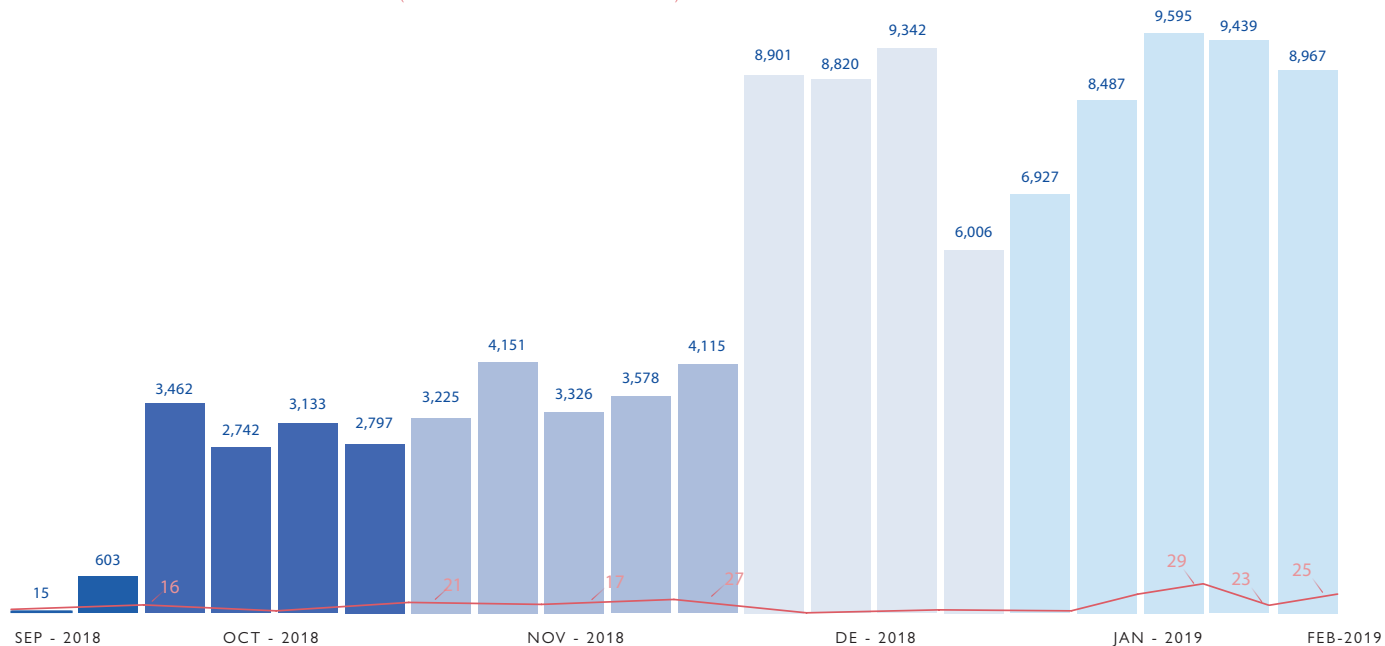

HEALTH FACILITIES SUPPORTED WITH WASH SERVICES: **3**

INDIVIDUALS REACHED WITH HYGIENE PROMOTION: **64,849**

TOTAL INDIVIDUALS SCREENED FOR EVD SINCE SEPTEMBER 2018

— CASES OF NON-EVD FEVER (WEEKS WITH 10+ CASES NOTED)

WEEKLY COORDINATION NOTES

IOM chaired the weekly Border Health (BH) and Point of Entry (PoE) Technical Working Group as co-lead, which was a joint meeting with the Access, Safety and Security Technical Working Group. The key areas of discussion and action points included the following

- IOM made a presentation on implementation modality at Yei River State during the Strategic Advisory Group (SAG) meeting where the key message was on building partnerships with local authorities on the ground before, after and during activities
- It was agreed to have one joint monthly meeting between the two technical working groups to ensure better collaboration and support to the teams on the grounds, shipment of any materials and supplies and establishment of new PoEs
- On the enforcement of usage of the International Arrival Health Forms (IAHF) forms, airlines not complying were listed and shared at the National Task Force.

SECURITY CHALLENGES

- Tokori is still inaccessible and without phone network, delaying reporting from IOM's screening site and blocking delivery of WASH items, stalling borehole rehabilitation
- Lujulu is also inaccessible due to insecurity in Morobo and hindering the work of the health and hygiene promotion teams

HYGIENE PROMOTION
