Quarter 4 Accomplishments

During Quarter 4, IOM provided Water Sanitation and Hygiene (WASH) services in three protection of civilian Sites (Bentiu, Malakal and Wau PoCs) and scaled up mobile interventions of WASH services and gender-based violence (GBV) prevention in remote locations. In total, IOM reached 355,100 beneficiaries with safe water, sanitation and hygiene promotion across eight different states of the country. In addition, IOM manages 50 per cent of the WASH Core Pipeline in South Sudan, successfully supporting the WASH Cluster to maintain a high level of preparedness. In Juba, Central Equatoria, IOM completed three solar-powered water yards at Joppa. As part of IOM's Ebola Virus Disease (EVD) preparedness efforts, the WASH team rehabilitated the water system at the hospital in Yei and carried out hygiene promotion at IOM's EVD screening sites and the communities living near them.

Gender-Based Violence Prevention Mainstreaming

- 1457 girls and women reached with Dignity Kits
- 55 IOM and GBV partner staff trained on GBV mainstreaming
- 23 IOM and partner staff trained on disability inclusion (facilitated by Humanity and Inclusion)
- 10 women from water management committee, community hygiene promoters and livelihoods groups trained on women's leadership and confidence building
- 26 MHPSS staff trained on GBV basics, safe and ethical referral

WASH BENEFICIARIES OUTSIDE PoC SITES AND COLLECTIVE CENTRES

QUARTER 4 HIGHLIGHTS

551,839

individuals reached in Q4 by IOM WASH and core pipeline services

158,500

people in PoC sites and collective centres reached with WASH services

245

hygiene promoters trained outside of PoCs

256

metric tons of WASH Core Pipeline supplies pre-positioned

196,739

individuals reached through WASH Core Pipeline

47

boreholes rehabilitated or drilled outside PoC sites

23,500

IDPs and host community members provided access to safe water and hygiene messaging via EPnR and CHRT

67,148

individuals provided with hygiene promotion messaging
